

Patricia Nyanchama Makori, Kenya
Dr. Achim Albrecht, Germany

We met in 2016 as members of a non-profit organization working on a vision correction project. At that time, Patricia was the Kenyan director and Achim was the German country coordinator. During this project, we encountered an albino woman who suffered from severe mobility problems and crawled to the hospital for treatment. This experience inspired us to initiate small projects to support those in need, which led to the founding of **BLACK AND WHITE**. In Kenya, we cooperate with church and private organizations as well as the Kenyan Red Cross.

To date, **BLACK AND WHITE** has:

- Donated 10 wheelchairs to people with mobility problems.
- The education of three girls and one boy (two girls born to a single mother with HIV and two – one girl and one boy – half-orphans whose mother committed suicide) was fully funded, including fees, books, food, accommodation, medical care, and clothing.
- Partially supported the education and feeding of two students from a family affected by alcoholism.
- Conducted online leadership trainings with approximately 50 students in cooperation with a Canadian NGO

Since 2023, the focus has been on providing **food to needy children and adults in Turkana County**, and in the summer of 2024, over **9 tons** of food were purchased and distributed to 500-600 children for the first time, thus alleviating the region's greatest need for a few months. In 2024 and February 2025 **BLACK AND WHITE** had two more food deliveries (total approx. **7 tons**) to Turkana County.

In August 2025, we were able to supply the village of Nakolonyoi with over 11 tons of food, hire a teacher, and make initial preparations for drilling a borehole.
