

ROSE'S NEW "WHEELS FOR LEGS"

The beautiful Rose has been on a long journey that many have seen her as a poor and unkempt teenager she has been looking like a poor girl tilling land day and night who had no time to wash herself like others. Today, we are sure that all the joy and happiness have not only come to a new leave turn of Rose after crawling and frog jumping for 17 years but also to her mother, sisters, brothers, neighbours, friends and relatives.

Rose has found a new life with (you), her new friends far away thousands of KMs from her simple home, you have jointly joined hands together by opening your pocket wallets to opening a new chapter in her life. She may never meet you but she will never forget you for making a difference in her life. You have no idea how big you made rose smile when she saw us arriving with her wheelchair on motorbikes. She was so happy though a little bit shaken when we were trying to place her on the wheelchair. As soon as she sat on it, she wouldn't hide her excitement and joy that was all over her face and started imitating the sound of a car starting the engine hooting "piiiiipiiiiipiiii" to all those who were around when she was being pushed on her wheelchair to clear her way not to cause an accident at her home. What a clever girl who can neither speak nor write but can hear

Rose has now not only on a new wheelchair but also new clothes, we have been seeing rose nearly every day in the same clothes and if she changes them, it will be twice a month so there was need from our side to present a few pairs of decent clothes she can be able to put on during some occasions and even changing at least twice or three times a week while at home instead of the whole month with the same clothes. Providing her with shoes is a bit challenging as her mom said that she will not use them. She will leave them anywhere but still we are thinking if providing her like two pairs so that when she is going to church and being under the watch of her mom, she will take control of her not losing them.

On behalf of Rose who cannot speak herself and her mother who can't write and speak English, we The Black and White Foundation sincerely thank you all for making Rose and her family smile more than the previous days and giving her a chance to be taken to church as these were her mom's first words "next week I will go to church with my daughter for the first time thank you and thank you my daughter's donors"

Thank you so much for aiding BlackAndWhite Foundation fundraising efforts and transforming lives through the gift of mobility so far, we have been able to provide 3 wheelchairs. **Asante Sana** for giving us a hand and 3 people who now have a wheelchair because of your great heart and generosity
