Children School in Kakamega

They are the best gift one ever get in lifetime

We feel like tear drops when we cannot deliver the wheelchair to the little angles in Kakamega actually because of political demos, violence and riots that are going on in our country Kenya.

When we saw some of them limping to school, church, to the river fetching water and collecting firewood for preparing their breakfast, lunch and dinner with difficulties of mobility and some even making 2-3 stop overs before reaching their homes this sent us to the Flash back of being in a Christian school where we were taught about the bible and Jesus welcoming the young children coming to Him, now we come up with "Let the little children come to the Black and White Foundation, and do not hinder them, for the donors with a great heart will support their needy parents with the little they have. We tell you the truth, anyone who will feel touched by all the children with special needs will receive all the blessings for we do not know how much to reward back to you for your continued support except using the simple words by saying ASANTE SANA."

With the help of Aziza for sure we shall have the first kids' wheelchair delivered to Daisy Special School in Kakamega headed by Rosemary Obiero.

We believe this is the best way to bless those children though the one wheelchair is not enough.
